Charge them 100%!!

Hi Julia,

For the June it's 100% for sure – as far as I remember we had no group meetings, only very short ones.

As for other outside activity – I only visited the «Challengers» conference for the day and a half – but there was Maria's talk there and she gave me the flyer.

When I have showed Maria the «button» on Tuesday she told me that Luis wanted me also to make MS and RNAseq data load and views by the end of this month.

Whereas we were talking that I can make only RNAseq boilerplates with filename as a tag to identify the mapping data because these data are not annotated yet.

So this is the only task (RNAseq load and views, processing was previously done) I am to finish now: – ORFs, protein annotations linking (by Tuesday) + conservation search: this all done by this morning (both loading and view), and only because I tried to keep my back safe and had DB model class prepared and DB structure preloaded

The last usually comes after data are processed (i.e. processing classes/functions are ready) for loading/views in advance, though I had no enough information for that by the time of that meeting with Luis due to the reasons which were not my fault.

For MS data I even do not have a proper file for loading, only a messy xls where the data are to be extracted manually first as they are in the columns among the others with no specified (constantly) numbers of these columns. And that was the task (the necessary processing is done for show/discussion) which was not commented by Maria:

the email where I reported it's result with the file in Dropbox was not replied and shortly after that there was that meeting with Luis where I felt I've been exposed almost as doing nothing or very little...

To make MS data load and view as they want, though even «pre»-boilerplate as processing results are not yet completely clear to me, – I decided to skip today's meeting.

Feel really embarrassed and stressed out...

From March to May it should be no more than 70% and no less for sure too, as I had no tasks within our group and the other stuff could not take more time than 30%.

Cheers, –
Catherine

Hi Katya,

Could you please give me these two numbers for hours spent on Luis tasks including his meetings and hours spent on other activities (group meetings, seminars)?

These numbers together should give a total number of your working hours for the period March 1 - June 30 (yes starting from very beginning), assuming 8 hour day.

Thanks,

Julia
